

Working with Terrabase you can revolutionise the way your organisation operates, enhancing internal efficiencies and maximising your customer service levels.

From our complementary IT hardware and software review, through to the development of bespoke software, at Terrabase we work closely with our clients to deliver solutions which help them to compete effectively in an increasingly demanding commercial environment.

And as each project we deliver is provided with a comprehensive support contract you can rest assured that your solution works for your business now, and in the future. This support does not simply address issues when they occur but we also proactively work with you to

continuously enhance system functionality and performance.

Our team is made up of experienced software developers who are conversant in the latest programming languages and techniques. Trained to the exacting standards required by the Microsoft Certified Professional programme, our developers adhere to industry best practice, with our software development projects managed and undertaken to the highest quality and compliance standards.

Software products  
and  
**bespoke**  
systems  
to do business

Terrabase is a leading provider of bespoke computer software, developing solutions for organisations of all types and size, including Government agencies, major plcs and a broad selection of SMEs.

Having developed a wide range of software applications, we are experts in the development of bespoke software applications, from standard management and accounting packages through to applications which are specific to an industry sector, such as property administration and security management solutions.

Whether it's a custom-built network wide system or one of our off-the-shelf products, Terrabase has a solution for your organisation which will help you maximise productivity and efficiency, whilst

at the same time reducing costs. And as we are able to customise our standard packages you can benefit from a cost-effective software solution which has been optimised to match your specific requirements.

Terrabase has an enviable track record in the development of software solutions. Working with some of the country's leading businesses and organisations, as well as a large number of smaller organisations, we have developed a range of leading-edge software applications, which have helped our clients to maximise the benefits they get from their IT infrastructure.

**We have developed solutions for the following organisations:**

- |                          |                                       |
|--------------------------|---------------------------------------|
| A&G Belcoo               | Prevention & Detection (Holdings) Ltd |
| Aspire Education         | Quickline Logistics Ltd               |
| Blake College            | Regrow Ltd                            |
| Brocklehurst Associates  | Response Recruitment                  |
| Bovis Construction       | TerraFirma Software Ltd               |
| Cheshire County Council  | The John Gregory Organisation         |

| Danson Securities        | Wates Group Ltd                       |
| Euro Finance Conferences | Woldmarsh Producers Ltd               |
| GLime Ltd                |                                       |
| Lafarge Aggregates       |                                       |
| McNeill Associates       |                                       |
| Ministry of Defence      |                                       |
| Mount Delvin Homes       |                                       |

Terrabase has a range of products and services which have been designed to help organisations benefit from the latest IT hardware and software developments.

In addition to our bespoke software development, where solutions are designed to address your unique requirements, Terrabase has a range of 'off-the-shelf' software products which have been developed to address particular management and administration issues across a wide range of business applications and industry sectors.

**DevApp**

Land valuation application designed for the new-build housing market, including developers, valuers and fund managers.

**BuyToLet**

Sophisticated accounting application aimed at landlords and rental agents for the management of a property portfolio.

**JobSys**

Personnel application for the

management and administration of staff, especially suited to employment agencies.

**Supplies**

Archive, analyse and report on supplies purchase history, ideal for purchasing departments to help reduce the cost of supplies.

**EasyTax**

Programming tool for developing payroll software, including the generation and calculation of PAYE and NI contributions.

**GMS**

Designed specifically for companies providing Manned Security, GMS is a guard allocation system which matches supply to client needs.
