*"Well, recent news has shown how scrimping on IT budgets can lead to tremendous costs further down the line. Our repeating mantra of good systems pay for themselves is more relevant now than ever."*

**Our favourites**

[desktop.google.com](http://desktop.google.com) - Search your computer as easily as you search the web with Google

**Featured Article****Secure Government Data Transfer**

So civil servants, police, MI5, private security operatives and postmen have all been scrabbling around like a stressed sales exec searching for his car keys.

At Terrabase there were gogs all over the offices, I too was indeed agog. How could this have happened? But having said that, I think many organisations are already thinking 'But for the Grace of God....'

One of our major Government clients use a secure data transfer portal (code name Cryptex). We developed it for them using up to 256bit SSL encryption to allow data providers to upload files to secure servers where authorised collectors can login and download the files.

At the moment the service is for a specific client, however they are looking to extend this out to a wider audience.

Our client plans to market this service to other Government departments in the New Year, but in the meantime, if it sparks your

interest, drop us a line and we'll talk about what we can do for you.

### **Christmas OFFER on DevApp land valuation software**

Buy 2 or more DevApp licences before the New Year and we'll throw in a free, professionally designed website for your organisation using your photos, logos and branding. It'll just be a basic brochure site like [www.biocurious.co.uk](http://www.biocurious.co.uk), but for many of you that may be all the web presence you need for now.

Buy DevApp from [www.devapp.co.uk](http://www.devapp.co.uk) and contact us to chat about exactly what you want.

### **And Merry Christmas one and all**

Merry Christmas to you. May your decorations be tasteful and your gifts be well received.
